

COMPOSITE DOOR
COLLECTION

inox barcelona
with kensington glass

OUR DOOR

Our Composite Door is a combination of traditional looks and advanced manufacturing techniques. Although looking like a traditional timber door, our composite doors are manufactured using grained GRP skins with a composite core that will stand the test of time, reduce your energy bills and continue to look stunning for years to come.

LOOKS THAT COUNT

Your front door is the entrance to your home and says so much about you - so why compromise. The high-definition embossing of the GRP skins give a real wood-look and the mouldings give the feel of a traditional timber door. As well as the woodgrain effects, we also offer our door in a range of 15 paint finishes to really make your entranceway something special.

KEEP THE WEATHER OUT - KEEP THE HEAT IN

Composite doors are much more thermally efficient than either timber or PVC doors and achieve considerably better 'U' values than required by the latest building regulations. They also have multiple seals to ensure that drafts are a thing of the past.

Secured by Design

Official Police Security Initiative

DESIGNED WITH SECURITY IN MIND

A massive 67% of burglaries are through a door, so fitting a high security door is essential. All our doors can be fitted with multi-point locking systems and have been tested to 'Secured by Design' standard. The option of upgrading the glass from toughened to laminated is available if required. Our composite doors have been tested to the rigorous PAS 24 standard.

LONG TERM PERFORMANCE

Most timber doors will expand and contract with the changing weather and are susceptible to warping and twisting. With our composite door, the internal construction of timber, LVL and composite material combined with a high density polyurethane core is designed for maximum strength that will remain stable whatever the weather.

VIRTUALLY MAINTENANCE FREE

Our specially developed GRP skins, combined with an industry leading paint finish, will maintain its colour and gloss for many years and there is no need for repainting or staining. Simply wipe down the door and it will continue to look as good as new.

COMPOSITE DOOR COLOUR OPTIONS

STANDARD COLOURS

PREMIUM COLOURS

COLOUR MATCHING AVAILABLE

Our mixing system allows a choice of colour options from the popular RAL colour range.

With our high performance paint technology, we can provide a wider palette of door colours including options for customers looking to match PVC-u colour foiled frames.

Our doors are available in a range of standard colour finishes, but with our state-of-the-art paint plant, we can now provide a wide range of specialist colours and a colour matching service.

THERMALLY EFFICIENT GLASS DECORATION WITH ADDED PERFORMANCE

Modern Composite doors are a combination of great looks and high performance, with strength, low maintenance and probably, most important of all, superb energy efficiency.

As energy costs continue to rise, choosing a door that keeps in the heat and keeps out the cold is now more important than ever - and composite doors are the most energy efficient on the market today.

The performance of the door is achieved by a combination of the latest technologies which include the glass elements.

GLAZING STYLES

BRASS/ZINC ART

Stunning visual effect with multiple glass textures and bevels

Most units are triple glazed for easy cleaning and extra security

It is possible to produce matching sidelights or toplights

CRYSTAL ART

Encapsulated inside a double glazed unit for easy cleaning

Stunning bevel effects which beautifully refract light

High levels of privacy with textured glass effects and prismatic bevel effects

It is not possible to produce matching sidelights or toplights

FUSION/ETCH ART

Contemporary glass designs using fused glass or clear bevel elements

Dual Glazed construction so you can touch the glass elements

Colour changes available to match or complement the door colour

It is possible to produce matching sidelights or toplights

RESIN ART

Fine lines and hand-painting allow for very intricate designs

Dual glazed construction so you can touch the glass elements

It is possible to produce matching sidelights or toplights

Large range of textured backing glass is available for added privacy

OVERLAY ART

Dual glazed construction so you can touch the glass elements

Colour changes available to match or complement the door colour

It is possible to produce matching sidelights or toplights

Large range of textured backing glass is available for added privacy
